

## PORIFEROUS Polyethylene Implants Featuring **SU-POR®** Biomaterial.

PATENT PENDING

Poriferous is pleased to offer the following patent pending device

### Su-Por AIRO™ Implant

Designed with Michael A. Burnstine, M.D.

"The Su-Por AIRO Implant is a composite microchannel-suture brow suspension implant comprised of a porous sheet with a microchannel inlay. The implant acts to lift and fill the eyebrow. Where other suture and barbed suture techniques have failed because of cheese-wiring, this minimally invasive brow suspension technique succeeds because of elevation of the ROOF fat with porous scaffold to allow tissue ingrowth to help stabilize, elevate, and fix the eyebrow. The implant is anchored and stabilized to the deep temporalis fascia at the hairline for temporal eyebrow elevation."

-Michael A. Burnstine, M.D.

Cat #	Description	Dimensions
4442	Airo -Small Qty 1	10mm x 5.0mm x 0.45mm
4443	Airo -Large Qty 1	21mm x 9.5mm x 0.45mm
4444	Airo -Small Qty 2	10mm x 5.0mm x 0.45mm
4445	Airo -Large Qty 2	21mm x 9.5mm x 0.45mm
